

Curriculum and Instruction

Ongoing Teacher Coaching & Support

IMPLEMENTATION PLAYS

- We partner with school leaders to analyze student performance and observational data to make decisions about focus areas for professional development and to identify individual teachers for coaching/support.
- We provide differentiated support at the level of the individual teacher and the school to support in building strong pedagogical practice and strong classroom cultures, management, and routines across content areas.
- We provide side-by-side coaching to school leaders to calibrate on instruction, co-draft feedback on observation, and co-design professional development supports to address gaps in practice.
- We provide support to individual teachers and grade level teams with planning, observation and coaching, and data analysis.
