

## School Leadership

# Leadership Support

The Partnership supports principals as school leaders by guiding and supporting the development of systems that make operational and organizational issues easier to manage.

### IMPLEMENTATION PLAYS

- We focus coaching on the most complex and challenging aspects of leadership (e.g., building systems, changing culture, instructional leadership). Along these lines, we guide the development of systems such as performance evaluation, facilities, hiring and recruitment, compliance, and support leaders to manage and delegate related tasks.
- We invest heavily in reducing operational and organizational barriers by staffing [Talent](#) and [Operations](#) teams at the home office that provide direct support to schools in concert with Academic team senior directors. With this help, Partnership principals are able to build systems that minimize the impact of operational and organizational issues and allow for more time to engage in instructional leadership.
